None

Additions to the Agenda

None

Approval of Minutes from September meeting

Tabled until next meeting

Old Business

- Survey results overview:
 - ~3,300 adults surveyed, we received 403 responses (~12% response rate)
 - We reviewed a PowerPoint presentation of the survey results
 - Send Frank additional analyses we are interested in seeing (e.g., cross variant analysis). Examples include:
 - Cross-variant analysis for questions FE5 and FE6 compared to people who have or have had kids in school
 - Also, analyze priority for question R1 versus Gadbois property use (pavilion)
 - Expect to have and do have kids – can we exclude current kids from “expect to have” so we can gain insight into how many new kids to expect?
 - Age and public transportation

Next Steps

- Share results with various Boards and Commissions
- Prepare a presentation for the public website: Executive Summary, PowerPoint, and summary of verbatims
- Next meeting (tentative): Review executive summary on Wednesday, February 3
